Summary

Enterprise systems and infrastructure professional with 10 years of experience modernizing video surveillance, access control, and security technology environments across corporate, manufacturing, and hospitality sectors. Experienced supporting enterprise infrastructure operations, platform migrations, and GSOC modernization initiatives in complex, business-critical environments. Strong background coordinating with IT teams, security stakeholders, and external partners to deliver practical, reliable technology solutions at enterprise scale.

Professional Experience

Physical Security Systems Engineer (Whirlpool Corporation)

June 2020 - Present

Virtual Software Equipment & Consulting, LLC (VSEC)

- Lead technical operations supporting enterprise security technology platforms across manufacturing and distribution environments, including video surveillance and access control systems.
- Lead evaluation, design, and deployment of physical security solutions aligned with enterprise architecture standards, cybersecurity requirements, and operational needs.
- Modernized legacy video surveillance infrastructure by migrating distributed systems into a standardized enterprise platform (Milestone XProtect), improving resilience and long-term maintainability.
- Supported migration of the CCure access control platform from on-premises infrastructure to a cloud-hosted environment in partnership with IT infrastructure, cybersecurity, and external consultants.
- Modernized GSOC operations through integration of automated video workflows and event-driven monitoring, improving situational awareness and operational response capabilities.
- Coordinate with infrastructure, Active Directory, and network operations teams to support enterprise deployments, including domain onboarding, IP provisioning, VLAN alignment, and connectivity troubleshooting.
- Remediate enterprise infrastructure vulnerabilities by tracking and prioritizing threats within Armis Centrix (SILK).
- Lead troubleshooting and resolution efforts for high-impact platform issues through ServiceNow ITSM workflows across application, server, and network layers.

Key Technologies: Windows Server, Active Directory, PowerShell, ServiceNow, Armis Centrix (SILK), TCP/IP, VLANs, DNS, Milestone XProtect VMS, Softwarehouse CCure 9000

Physical Security Systems Engineer & Compliance Program Lead (Hyatt Hotels Corporation)

April 2018 - June 2020

Virtual Software Equipment & Consulting, LLC (VSEC)

- Designed and deployed enterprise video surveillance infrastructure upgrades across Hyatt's global hotel portfolio, including server architecture, network integration, secure remote access solutions, and platform standardization.
- Managed full project lifecycles, including stakeholder requirements gathering, system design, implementation planning, deployment, and ongoing application support.
- Conducted large-scale risk assessments and remote audits of legacy surveillance environments, identifying cybersecurity gaps and defining remediation priorities.
- Applied NIST 800-53 and ISO 27001 control frameworks to support enterprise risk management initiatives.
- Supported deployment of CrowdStrike Falcon sensors across surveillance infrastructure hosts and participated in vulnerability remediation efforts to improve enterprise security posture.
- Served as Hyatt's technical authority in reviewing third-party vendor system designs, identifying architectural gaps and ensuring alignment with corporate standards and operational requirements.
- Supported international projects across North America, South America, EMEA, and Asia-Pacific regions through extensive global travel and remote consulting.

Key Technologies: Windows Server, PowerShell, CrowdStrike Falcon, AWS, pfSense, OpenVPN, TCP/IP, Milestone XProtect VMS

Technical Support Technician / Team Lead

Mar 2016 - Mar 2018

Virtual Software Equipment & Consulting, LLC (VSEC)

- Supported and maintained enterprise video surveillance environments, including Windows Server-based systems running Milestone XProtect across multi-server deployments.
- Performed system configuration, troubleshooting, and remediation across servers, storage, IP cameras, and network connected devices to ensure platform stability and uptime.
- Led day-to-day technical support activities and escalations, coordinating with vendors and internal teams to resolve complex issues.
- Delivered remote training and technical guidance to end users and junior technicians supporting global customer environments.

Key Technologies: Windows Server, TCP/IP, Remote Support Tools, IP Cameras, Milestone XProtect VMS

Education

Oakland University, Rochester, MI

- Bachelor of Arts, Psychology, June 2014

Certifications

- AZ-900: Microsoft Azure Fundamentals
- Milestone Certified Integration Engineer (MCIE)
